

Backup

Gustavo Lopes

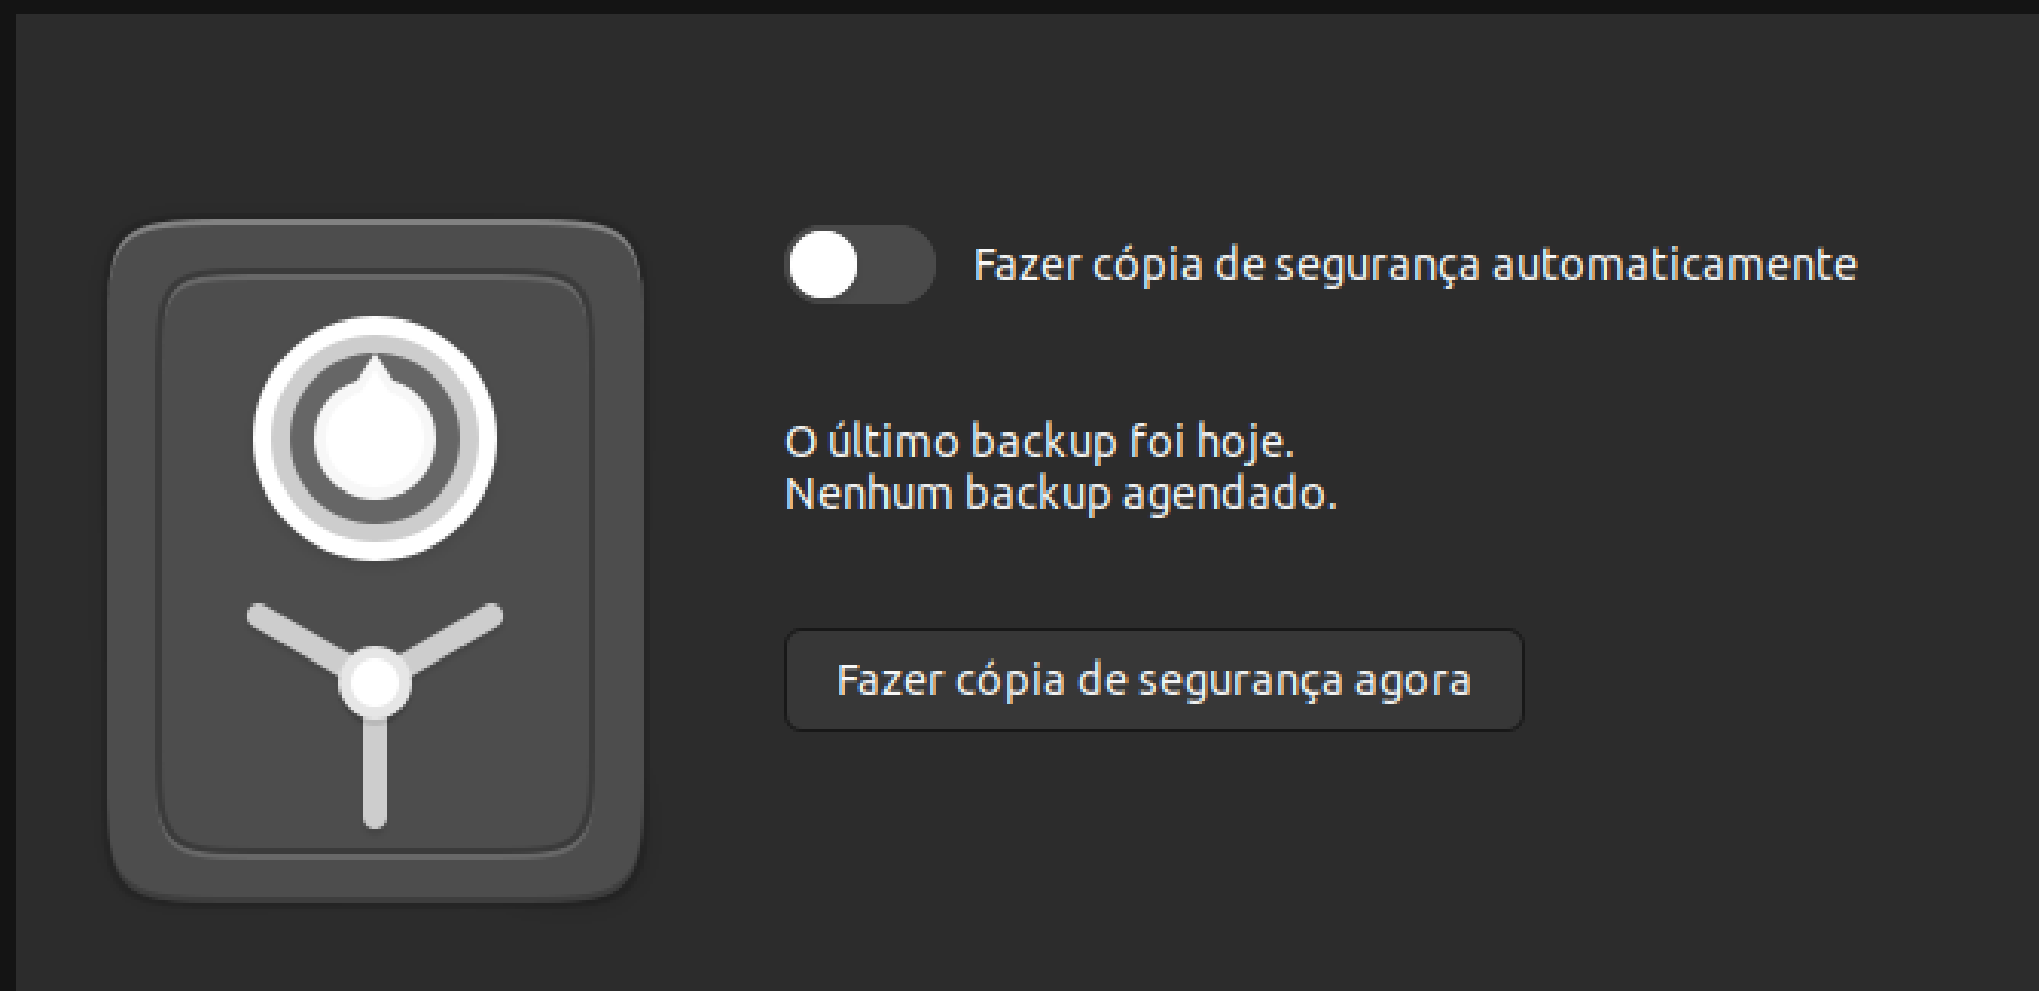

Backup

Para fazer o backup do seu linux abra o aplicativo Backup

Backup

Clique em fazer minha cópia de segurança agora

Backup

insira a pasta que deseja copiar o backup, depois insira se quer o armazenar no google drive ou em uma pasta pessoal.

Adicional: Mount e Unmount

```
gustavolopes@gustavolopes-VirtualBox:~$ mount  
sysfs on /sys type sysfs (rw,nosuid,nodev,noexec,  
proc on /proc type proc (rw,nosuid,nodev,noexec,  
udev on /dev type devtmpfs (rw,nosuid,relatime,s  
devpts on /dev/pts type devpts (rw,nosuid,noexec  
tmpfs on /run type tmpfs (rw,nosuid,nodev,noexec  
/dev/sda3 on / type ext4 (rw,relatime,errors=rem  
securityfs on /sys/kernel/security type security  
tmpfs on /dev/shm type tmpfs (rw,nosuid,nodev,in  
tmpfs on /run/lock type tmpfs (rw,nosuid,nodev,n  
cgroup2 on /sys/fs/cgroup type cgroup2 (rw,nosui  
pstore on /sys/fs/pstore type pstore (rw,nosuid,  
bpf on /sys/fs/bpf type bpf (rw,nosuid,nodev,noe  
gustavolopes@gustavolopes-VirtualBox:~$ unmount
```

Você poderá ver toda a hierarquia de diretórios

Obrigado!!!
